
PROJECT SPOTLIGHT | MILTON, DELAWARE

# Eagles Nest Church &
## Delmarva Christian Milton Campus

Two completed security, solar-control and privacy-film phases at one faith-based campus

## Project at a glance

**PHASE 1**
152 panes / approx. 1,232.33 sq. ft.

**PHASE 2**
113 panes / approx. 1,198.98 sq. ft.

**CAMPUS**
Church and Christian school

**SYSTEMS**
Security film, attachment, solar and privacy

# THE PROJECT STORY

## THE CHALLENGE

The shared campus included numerous entrances, classrooms, offices and gathering areas. The work required glass-retention support, solar control and privacy while installation was scheduled around active church and school operations.

## THE SOLUTION

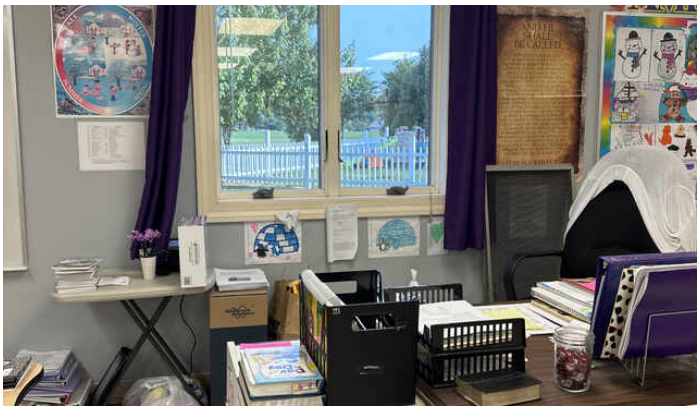
Project records include XPEL Security 8mil Silver 15 PS and a clear security-film system with attachment at designated entry points. Solar-control, mirrored and frosted treatments were assigned according to each area.

## THE RESULT

Purpose-selected systems addressed vulnerable glazing and occupied spaces without applying an unnecessarily dark or opaque treatment to every pane.

**PROJECT NOTE**

The two project records are separately associated with Delmarva Christian Milton Campus and Eagles Nest Church at the same 26631 Zion Church Road campus.



## Planning a church or faith-based facility project?

Use this completed project as local proof, then request a site-specific consultation.
