

PROJECT SPOTLIGHT | DAGSBORO, DELAWARE

High Tide Church

A coordinated solar, privacy, security and decorative-film plan for multiple areas

Project at a glance

AREAS

Entrance, offices, nursery and classrooms

PRODUCTS

Three purpose-selected XPEL films

BUILDING

Church

PRIMARY GOALS

Glare, solar exposure, privacy and security

PROJECT SPOTLIGHT | DAGSBORO, DELAWARE

THE PROJECT STORY

THE CHALLENGE

The setting sun directly affected the front of the building. The church also needed privacy in occupied rooms, a cleaner solution for interior classroom doors and an entrance treatment that complemented the facility.

THE SOLUTION

The film plan combined XPEL Security 8mil Silver 15 PS, XPEL Evening View 05 DA and XPEL White Frost. Each film was assigned according to the room use, glass location and desired outcome.

THE RESULT

The installation created a consistent front elevation while addressing glare, solar exposure and privacy. Interior frosting improved privacy, and designated security film added glass-retention benefits.

> *“The team arrived on time and were knowledgeable, fast and efficient... Highly recommend!” - Jaime Hardy, verified five-star review*

Planning a church or faith-based facility project?
